CARBON INFRARED HEATER

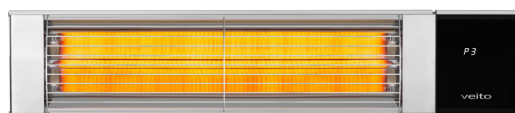

NEVADA

veito

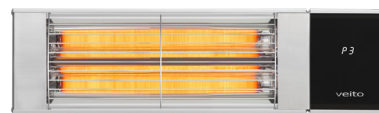

ZERO noise
odor
greenhouse gases

R2425

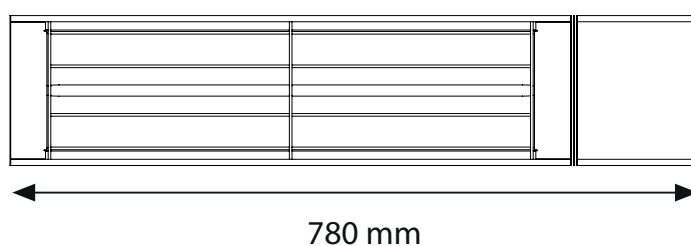

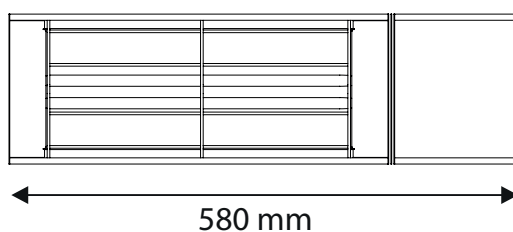

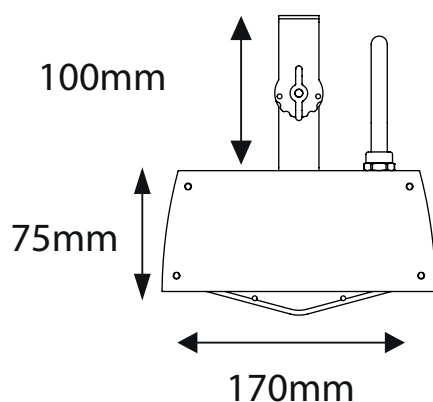

Model	R2425
Voltage	220-240V 50/60Hz
Power	2100-2500W
Weight	2,8 Kg
IP rating	IP55

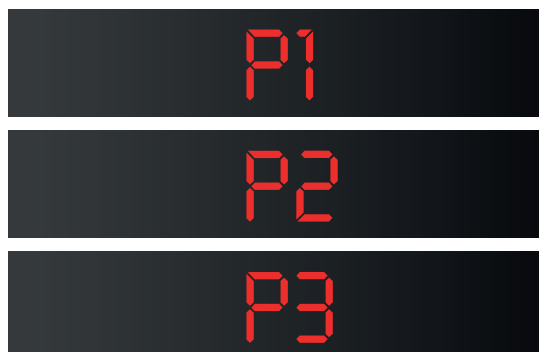

DR2424

Model	DR2424
Voltage	220-240V 50/60Hz
Power	2000-2400W
Weight	2,6 Kg
IP rating	IP55

DIGITAL THERMOSTAT

FROM REMOTE CONTROL

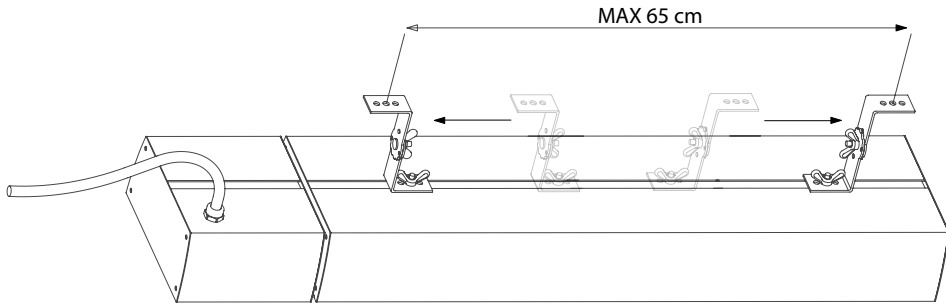

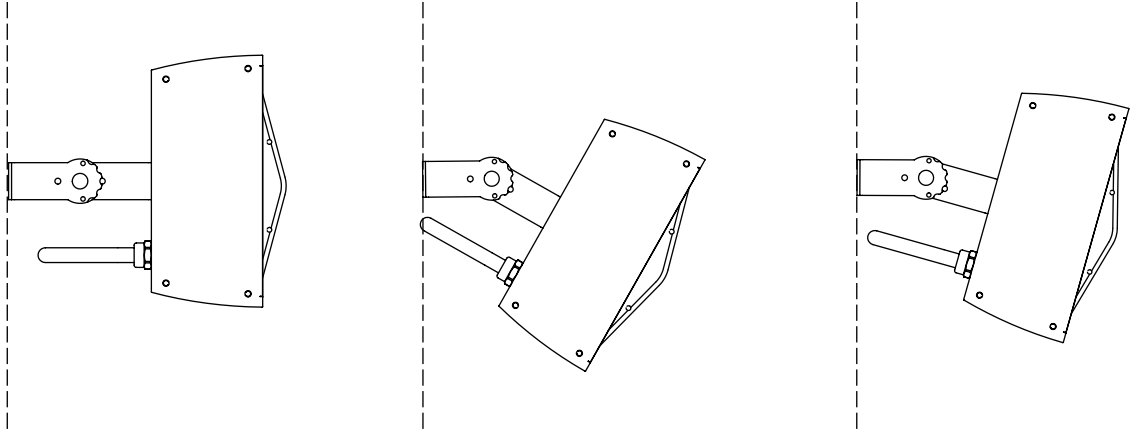

THE NEVADA

Carbon infrared heater generates low-glare, medium-wave infrared heat. Its comfortable warmth is distributed over a wide area, thanks to a specially designed reflector. The wavelength of the emitted heat enables the heat to travel long distances, transforming into a pleasant warmth. The heating intensity can be easily adjusted using the remote control. This innovative heater operates with exceptional efficiency, eliminating the need for additional insulation. As a result, it not only reduces energy consumption but also provides a consistent and comfortable environment year-round.

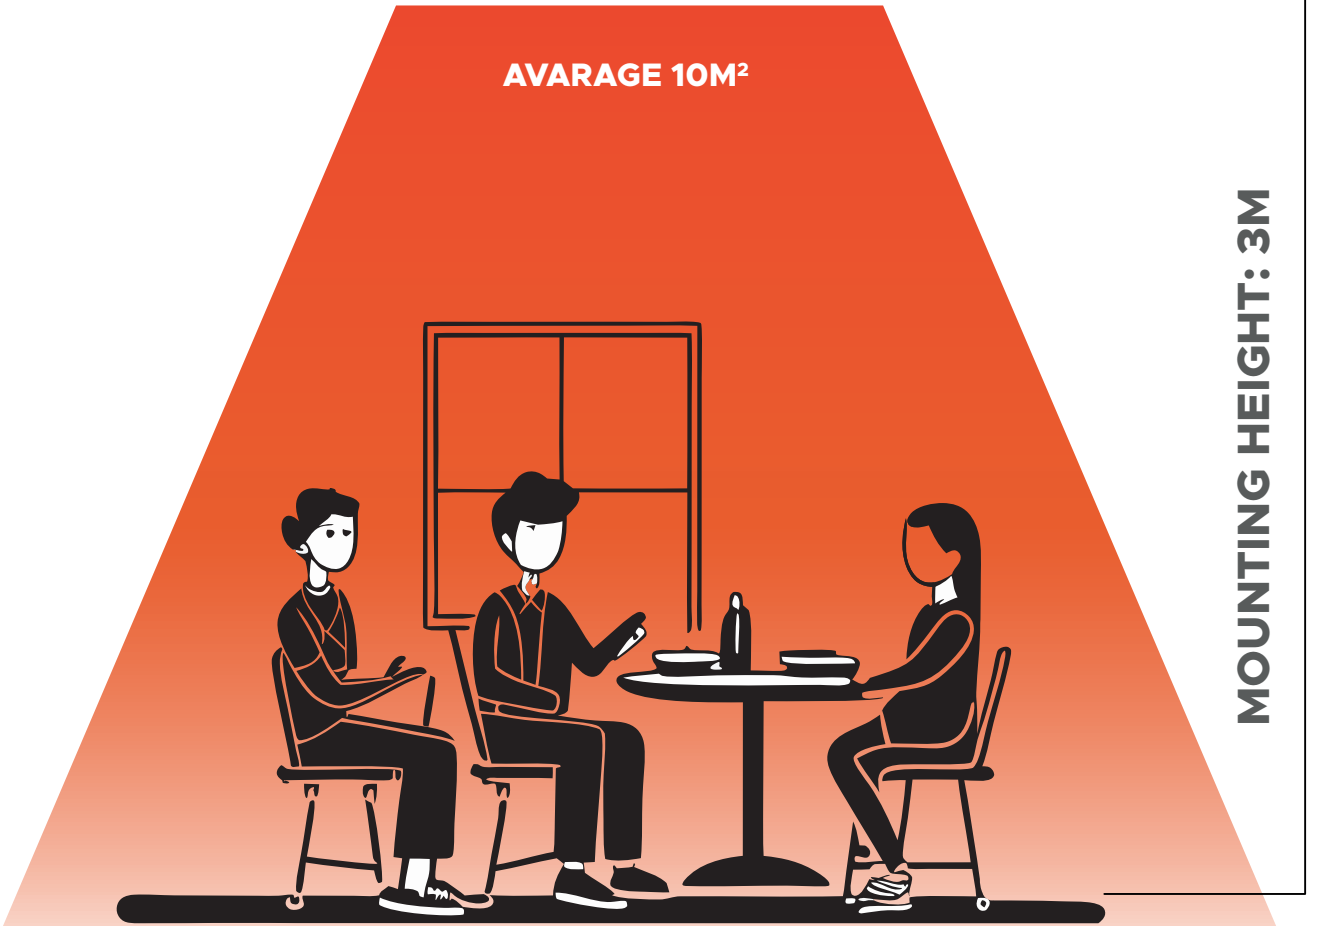

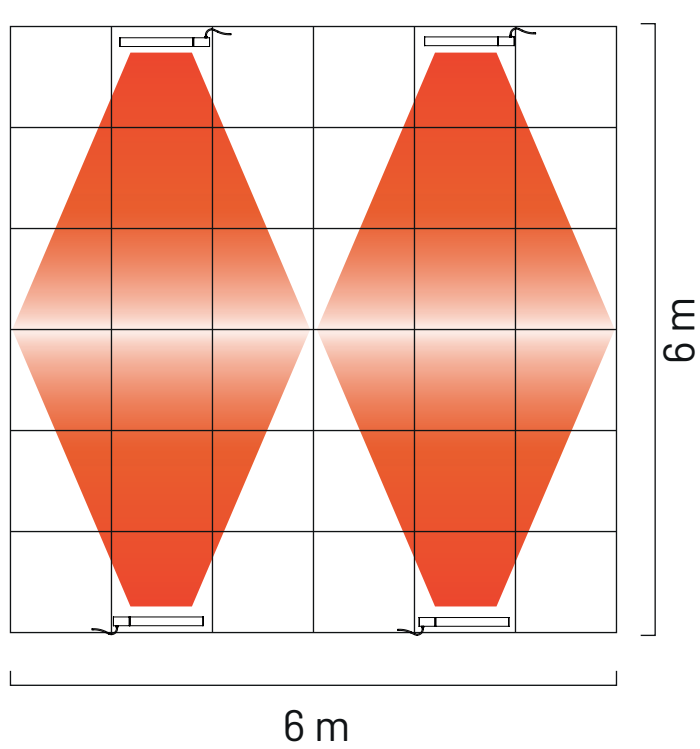

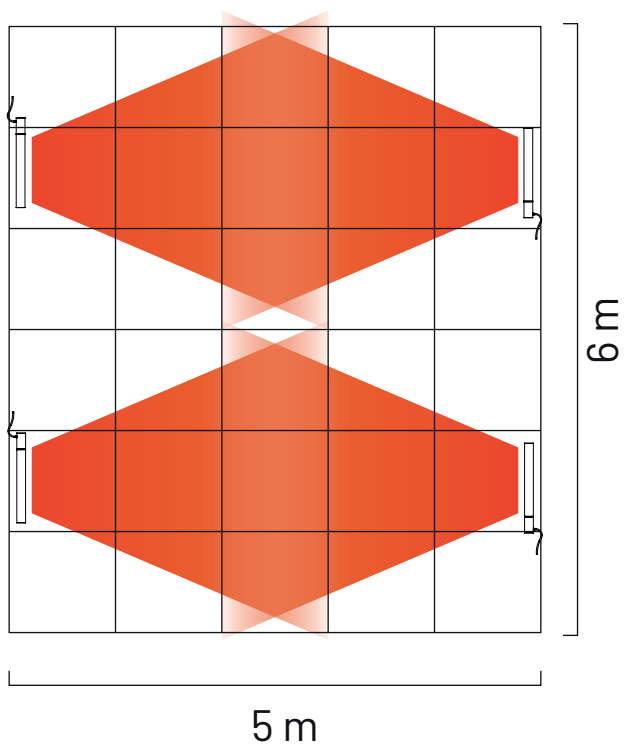

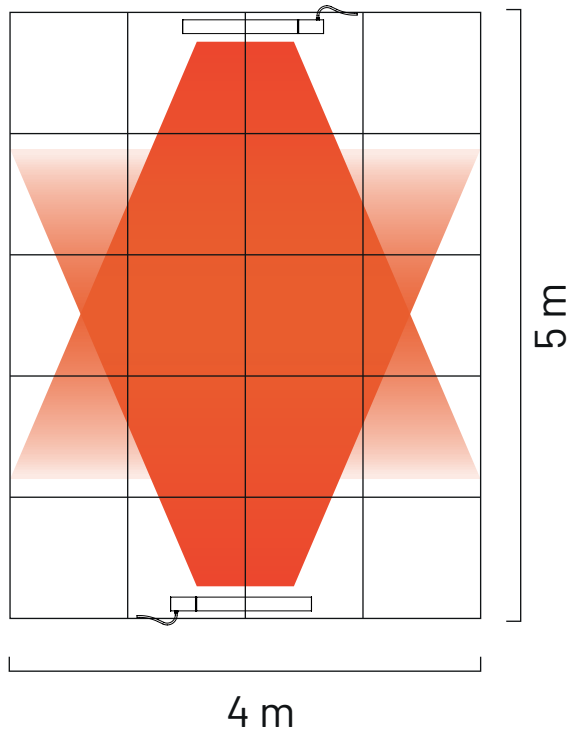

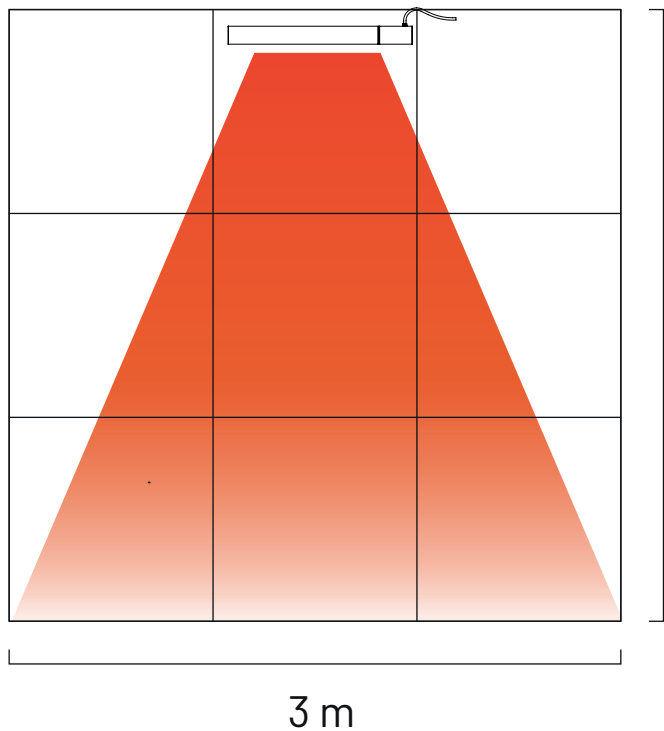

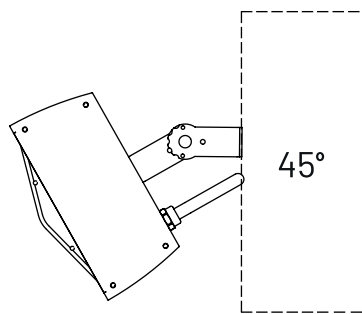

OUTDOOR COVERAGE AREA

AVERAGE 10M²

MOUNTING HEIGHT: 3M
